

Miracle Laser For Hair Loss Clears FDA Hurdle!

Well, the amazing 3A laser has done it again. Also known as cool, cold or soft laser, this laser has been used in the medical field for over 50 years to accelerate the healing process for wounds, ligament repair, tendon damage and pain management. It has also been cleared by the FDA for treatment of Carpal Tunnel Syndrome, and now—**Hair Loss.**

Before

After

Before

After

The 3A laser works via the principle of photo-bio stimulation, a process by which nutrient rich laser energy is delivered to the hair follicle.

What makes the 3A laser cool, cold or soft?

The 3A laser operates on a low level, it has no heat component and doesn't cause burning, cutting, discomfort or any harmful side effects. It has been proven to accelerate the body's healing ability by increasing the blood circulation and cellular activity. These lasers interact within the body to accelerate the rejuvenation and healing processes in the body. ***The Laser Can Reverse Hair Loss!***

In the cosmetic field, it is used to rejuvenate skin, reduce fine lines, increase cell development and cell proliferation. Now, as seen on ABC, CBS, NBC and FOX, it can reverse hair loss, make thin and weak hair thicker, healthier and fuller and it can actual-

ly grow hair! Sound too good to be true? The Food and Drug Administration cleared the 3A laser for exactly that in January of 2007.

Why choose Hair Growth Centers of America?

Hair Growth Centers of America has been a leader in Laser Hair Therapy since 2004, successfully helping thousands of clients reverse their hair loss. They also provide a very relaxed and discreet setting that many people describe as "serene."

"I had elective hair transplantation surgery about eight years ago. After the surgery, my hair continued to thin and fall out. I started Laser Hair Therapy last year and within three months, my hair stopped falling out and really started to grow. I couldn't believe the results achieved. I would recommend it to anyone."

— Paul Orlando

Why live with hair loss?

Call today for your FREE hair and scalp analysis to see with your own eyes how this little laser produces big results. If you call by Thursday, July 31st you will receive one FREE laser session!

Listen to Tim Reed with Anita Finley on Saturday, July 12 from 6:30-7:00 AM on WSBR 740AM and on the Internet at www.wsbradio.com.
